

SUSHMITHA BUNGATAVULA

Seattle, WA, USA | (940) 597-2706 | sushmithabungatavula07@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Software Engineer with ~3 years of experience in full-stack application development

EXPERIENCE

Software Engineering Intern

July 2026 – Present

ChiEAC Data Science Alliance

Remote, USA

- Reduced manual feedback analysis effort by 40% by building an AI-powered client feedback intelligence platform that automated sentiment analysis, theme extraction, review summarization, and improvement recommendations.
- Enabled data-driven instructor decisions by developing BI dashboards and an AI analytics assistant that surfaced satisfaction KPIs, emerging feedback themes, and evidence-based recommendations from aggregated feedback.

Software Developer

November 2021 – July 2024

DXC Technology

Hyderabad, India

- Led a team to develop an employee background verification application that reduced processing time by 30% and was delivered two weeks ahead of schedule.
- Integrated and configured PayPal, PhonePe, and GPay payment gateways using secure APIs, expanded subscription payment options, and increased completed transactions by 15%.
- Leveraged React.js, WebSockets, Node.js, MySQL, and MongoDB to build a scalable platform that handled 10,000 concurrent users while keeping response times under 200 ms.

EDUCATION

Master of Science (Computer Science)

August 2024 – May 2026

University of North Texas

Denton, TX

Selected coursework: Object-Oriented Programming, Data Structures and Algorithms, Machine Learning.

B.Tech (Electronics and Communication Engineering)

July 2017 – June 2021

Sridevi Women's Engineering College (JNTUH)

Hyderabad, India

SKILLS/TOOLS

- **Programming Languages:** Python, Java, SQL, JavaScript, TypeScript, HTML, CSS
- **Frameworks:** React.js, Next.js, Node.js, Spring Boot, FastAPI, .NET, Flask
- **APIs and Messaging:** REST APIs, WebSockets, Kafka, Postman, Swagger
- **Databases:** MySQL, Microsoft SQL Server, PostgreSQL, MongoDB
- **AI/ML Tech:** LLM APIs (Anthropic, OpenAI), Prompt Engineering, RAG, AI-assisted development tools (Copilot, Cursor)
- **Platforms/Tools:** AWS, GitHub, GitLab, Azure DevOps, CI/CD, Azure Pipelines, Jira, Agile (Scrum), Secure SDLC

PROJECTS

Bharat-Harvest: [Link](#)

May 2026

- Built a full-stack web application using **React and JavaScript** for Bharat Harvest, converting an agricultural e-commerce platform into a responsive web experience. Integrated **REST APIs with Java and Spring Boot** to fetch product and category data, implementing asynchronous data loading and error handling.

The Crowded Orbit: [Link](#)

December 2025

- Built an interactive web dashboard visualizing Low Earth Orbit congestion with **Python (Pandas), D3.js, and Three.js**, featuring reusable filters, smooth transitions, and 3D instanced rendering for performance. Focused on interactive data exploration, timeline analysis, orbital density visualization, and predictive scenario modeling.

Thrift Store System: [Link](#)

May 2025

- Designed and developed a web system to manage sales, vendors, and orders with automated inventory tracking and secure checkout using **SQL, React.js, Node.js, and responsive design**.

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) January 2024
- Microsoft Certified: Azure Fundamentals (AZ-900) February 2023

PERSONAL ACHIEVEMENTS

- **Design and Publicity Head** for College Campus Radio, overseeing creative projects and promotions.
