Seattle, WA | (940) 597-2706 | sushmithabungatavula07@gmail.com | [Portfolio](#) | [Linkedin](#) | [Github](#)

Software engineer with ~3 years of experience in full-stack application development

EXPERIENCE

Software Engineering Intern

ChiEAC Data Science Alliance

July 2026 – Present

Remote, USA

- Reduced manual feedback analysis effort by 40% by building an AI-powered client feedback intelligence platform that automated sentiment analysis, theme extraction, review summarization, and improvement recommendations.
- Enabled data-driven instructor decisions by developing BI dashboards and an AI analytics assistant that surfaced satisfaction KPIs, emerging feedback themes, and evidence-based recommendations from aggregated feedback.

Software Developer

DXC Technology

November 2021 – July 2024

Hyderabad, India

- Led a team to develop an employee background verification application that reduced processing time by 30% and was delivered two weeks ahead of schedule.
- Integrated and configured PayPal, PhonePe, and GPay payment gateways using secure APIs, expanded subscription payment options, and increased completed transactions by 15%.
- Leveraged React.js, WebSockets, Node.js, MySQL, and MongoDB to build a scalable platform that handled 10,000 concurrent users while keeping response times under 200 ms

EDUCATION

Master of Science (Computer Science)

University of North Texas

August 2024 – May 2026

Denton, Texas

Selected coursework: Object-Oriented Programming, Data Structures and Algorithms, Machine Learning

B. Tech (Electronics and Communications Engineering)

Sridevi women's engineering college (JNTU)

July 2017–June 2021

Hyderabad, India

SKILLS/TOOLS

- **Languages:** Python, Java, TypeScript, JavaScript, SQL, HTML5, CSS3
- **Frontend & Backend:** React.js, Next.js, Angular, Node.js, Spring Boot, Flask, FastAPI, .NET
- **APIs, Databases & Messaging:** REST APIs, WebSockets, Kafka, MySQL, PostgreSQL, MongoDB, Postman
- **AI/ML:** LLM APIs (OpenAI, Anthropic), Prompt Engineering, RAG, NLP, NumPy, Pandas
- **Cloud & DevOps:** AWS, Azure, Git, GitHub, GitLab, Azure DevOps, CI/CD, Azure Pipelines
- **Tools & Security:** Jira, GitHub Copilot, Cursor, Burp Suite, OWASP ZAP, Fortify, Checkmarx, Secure SDLC, Agile/Scrum

PROJECTS

Bharat-Harvest: [Link](#)

May 2026

- Built a full-stack web application using **React and TypeScript** for Bharat Harvest, converting an agricultural e-commerce platform into a responsive web experience. Integrated **REST APIs with Java and Spring Boot** to fetch product and category data, implementing asynchronous data loading and error handling.

The Crowded Orbit: [Link](#)

November 2025

- Built an interactive web dashboard visualizing Low Earth Orbit congestion with **Python (Pandas)**, **D3.js** and **Three.js**, featuring reusable filters, smooth transitions, and 3D instanced rendering for performance. Focused on interactive data exploration, timeline analysis, orbital density visualization, and predictive scenario modeling.

Thrift Store System: [Link](#)

March 2025

- Designed and developed a web system to manage sales, vendors, and orders with automated inventory tracking and secure checkout using **MySQL, React.js, Node.js, Responsive Design**.

CERTIFICATIONS/TRAINING

- AWS Certified Cloud Practitioner CLF-C02 January 2024
- Microsoft Certified Azure Fundamentals (AZ-900) February 2023

PERSONAL ACHIEVEMENTS

- **Design and Publicity Head** for College Campus Radio, overseeing creative projects and promotions.
